2023 continues Mission First Tactical's constant effort to innovate, looking to answer the needs of the marketplace. With this year's new product releases, MFT has developed upgraded holster designs and additional Modern Sporting Rifle (MSR) accessories.

MFT entered the holster market to fill a need; offering high-quality Kydex™ style holsters at a great price point, packaged right, and delivered on time, in volume.

This year reveals three new holster offerings; Pro Series Holster with a patent-pending retention system, Universal Belly Band, and Leather Hybrid. Utilizing innovative material technology, uncompromising quality, and cutting-edge design; these holsters are poised to disrupt the market status quo.

Building upon a solid foundation of MSR Rifle Accessories, our EXD offerings grow with new MLOK™ Free Float Rails, AR10A/SR25/M110 10 & 20 rd magazines, front & rear Steel Back Up Sights with a minimalistic rugged profile, and supplemental Transit/Impact/Dust Cover for the 5.56x45 MFT Magazine.

The MFT Custom Graphic Program is now in full swing! Designs are chemically bonded to ensure wear, scratch & chemical resistance. Customers can upload designs and create unique custom graphics on MFT products, ideal for any shop, group, or individual looking to add their own touch.

Follow us throughout the year for additional new product launches and updates. You won't want to miss what's on the horizon.

Vice President

# LEATHER HYBRID HOLSTERS

The holster you choose to carry every day should be the best of both worlds; functional and comfortable. The MFT Leather Hybrid Holster features a Kydex®-style holster body fused with Genuine American Full-Grain Leather. Gain all the benefits of Kydex®; exacting tolerances, secure retention and easy re-holstering along with Leather's comfort , style and feel. No break in time as compared to traditional leather holsters and a much longer service life.

American Full-Grain Leather

LEATHER HYBRID AIWB

A versatile AIWB, IWB, or convertible to OWB with paddle attachment. Capable of use both in right and left-hand positioning. Handmade to exacting tolerances for each model of handgun. Adjustable retention and the famous audible “CLICK” makes each draw and re-holster smooth and secure. All units come standard with a 1.5” Belt Clip.

LEATHER HYBRID OWB

A versatile OWB convertible to IWB. Handmade by to exacting tolerances for each model of handgun using the most advanced techniques and materials. Full Highride sweatguard for comfort. The famous audible“click” makes each draw and re-holstering smooth and secure. All units come with 1.5” belt clips and belt loops.

# BELLY BAND HOLSTER

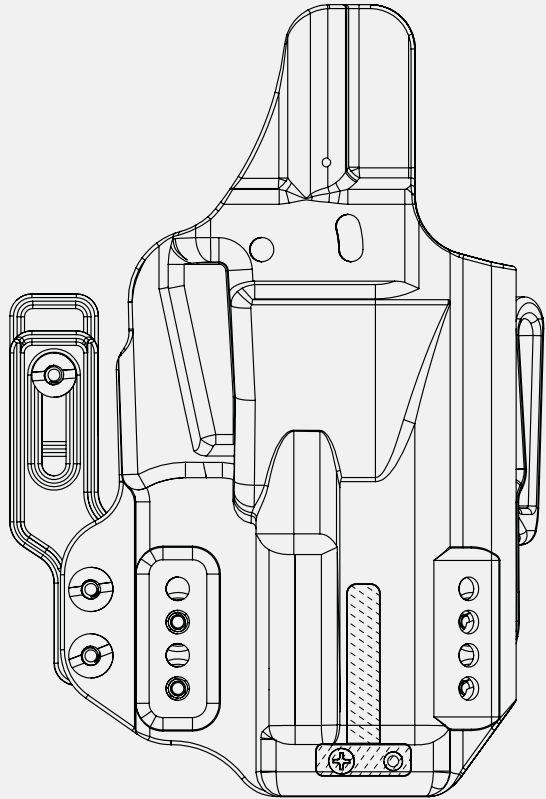

H6-BB-1

No belt needed! Great for activewear (walking, jogging, hiking etc) and ultra comfort around town. Comfortable all day carry is acheived through 3D Spacer Mesh Fabric. Channels allow for more efficient airflow, increasing comfort (in comparison with elastic bands). An Open Air Weave Construction Forms holes for air/moisture to pass through naturally hindering bacterial growth. Maximum breathability to keep you cool and dry! Soft Medical Grade Hook & Loop ensure no chaffing. With a self laminated fastening end cut/trimmed with scissors for a custom fit. No need for melting, binding, or stitching to prevent it from fraying.

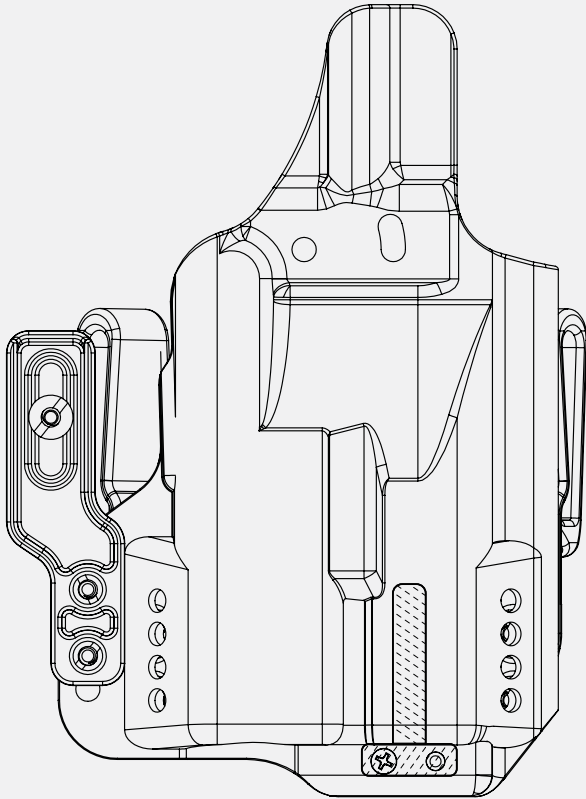

Hard Laminate Trigger Sheild / 2 utility elastic pockets for additional equipment / 2 secure YKK zippered storage pockets / Ambidextrous / Compatible with a wide variety of firearms / Fits 26 to 52" Waist.

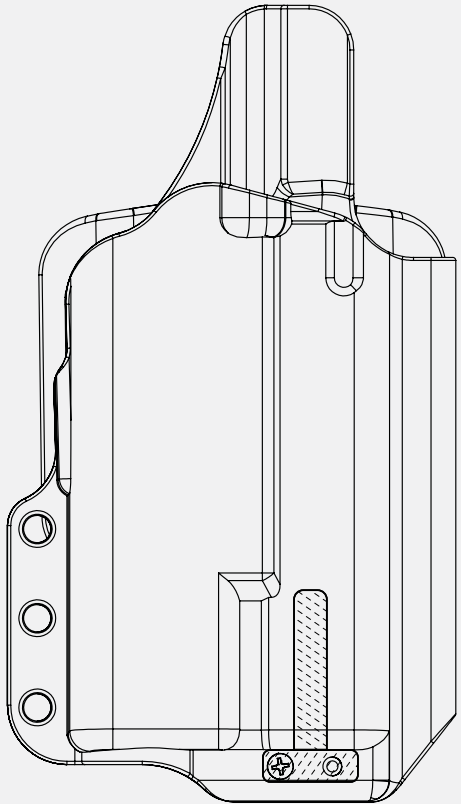

**Left to Right:** Zippered Storage Compartment • Utility Sleeve • Ambidextrous Carry Position with Hard Laminate Trigger Shield • Utility Sleeve • Zippered Storage Compartment • 3D Spacer Mesh • Medical Grade Hook & Loop

# PRO SERIES HOLSTERS

Advanced holster technology systems for the next level of concealed carry. Revolutionary design and engineering create a carry experience like no other.

**In-line Magnetic Retention System (ILMRS™)**  
11# maximum pull, strong Neodymium magnet maintains fully loaded pistol in holster without any locking devices. Audible click sound when pistol is fully seated in holster. *Patent Pending.*

**Integrated Barrel Stabilizer Insert (IBSI™)**  
Engineered to keep pistol in-line to holster body spine, which allows system to work with or without a under barrel mounted weapon light in use with magnet. Light Compatibility: TLR7 Footprint & TLR1 Footprint.

**Built-In Vertical Wedge** – Revolutionary design to bring top of pistol closer to body for ultra, concealment, and wedge against the body aids in holster slump and sagging. *Patent Pending*

**Optimized Mechanical Advantage (MAA-BC™)**  
Ambi- belt claw, with stackable thickness shims and height adjustability. *Patent Pending*

**PRO Series OWB Multi Hole Pattern**  
Compatible with: Safariland UBL, Blade Tech Tec-Lok Tek-Lok, G-Code RTI Hanger

Cut away detail of ILMRS & IBSI systems

## PRO SERIES OWB

 **BARREL STABILIZER**  
INTEGRATED INSERT

 **VERTICAL WEDGE**  
ULTRA CONCEALED

 **AMBI-BELT CLAW**  
STACKABLE THICKNESS

# EXD FREE FLOAT M-LOK® RAIL SYSTEM

Boasting multiple improvements, the new EXD Free Float M-LOK® Rail System is designed with the modern shooter in mind. Streamlined and user-friendly, the updated design allows shooters more time to send rounds down range and less time making field adjustments or modifications.

In addition, the upgraded upper receiver attachment system increases shooter stability and also minimizes the inner diameter, providing a more streamlined appearance. Updated modern wall thickness addresses the flimsiness of other rail systems by providing the strength needed to attach a variety of M-Lock® accessories.

Left to Right: EXD 30rd Window Magazine • EXD 10" M-LOK® Rail System • RCG Compact Foregrip • 3 Prong Ported Muzzle Brake

TMEXD-MHG-15

# EXD STEEL BACKUP SIGHTS

FRONT - BUEXD-F

Designed for a minimalistic but rugged profile. Tucking under other equipment while maintaining a strong secure backup solution when optics and other accessories fail. Front sight post is adjustable for elevation and threaded for AK pattern posts. Detent and Springs are eliminated, eliminating friction points. Reduction in hardware increases the robust nature all while minimizing complexity and failure points.

Slim profile / Manual flip up arm / Steel CNC construction (No cast parts) /  
Nitride coated with corrosion resistant hardware

REAR - BUEXD-R

Slim but rugged profile. Rear sights easily tuck under long-range optics and other equipment, maintaining a strong secure backup solution when optics fail. Rear sight post is Fixed 300 meter zero with 02 Rear sight peep size (fast & easy sight picture). Reduction in hardware increases the robust nature all while minimizing complexity and failure points.

Slim profile / Manual flip up arm / Steel CNC construction (No cast parts) /  
Nitride coated with corrosion resistant hardware

# EXD ALUMINUM MINIMALIST STOCK

BMSMIL-MTL

The lightest collapsible aluminum stock of its kind on the market, while still maintaining the strength and dependability you rely on. EXD Aluminum Minimalst Stock is completely adaptable to the needs of the environment and operation by utilizing custom accessory mounts, interchangeable butt plates, and accommodating a new custom sling configuration.

8.8oz / Manufactured from 6061-T6 Aluminum /  
Billet and extruded hard coat anodized to Mil-Spec

# EXD 7.62X51 NATO POLYMER MAGAZINE

10RD - 10EXD762X51  
20 RD - 20EXD762X51

Designed for the AR10A/SR25/M110 pattern rifles. Optimized for use with SAAMI-Spec 7.62x51/.308 Winchester ammunition. Utilizing new material technology and manufacturing processes for enhanced strength, durability, and reliability to exceed demanding military performance specs

20rd EXD 7.62x51 NATO Magazine

10rd EXD 7.62x51 NATO Magazine

# MFT 5.56 MAGAZINE TRANSIT COVER

PM556-CVR

Supplemental Transit/Impact/Dust Cover for the 5.56x45 MFT Magazine. Designed to protect the top of the magazine/cartridge, minimize debris interference and nest flush during storage and transit.

# M-LOK® COMPACT FOREGRIP

RCG

Compact textured vertical grip designed to minimize material and dimension while providing a positive grip surface
